

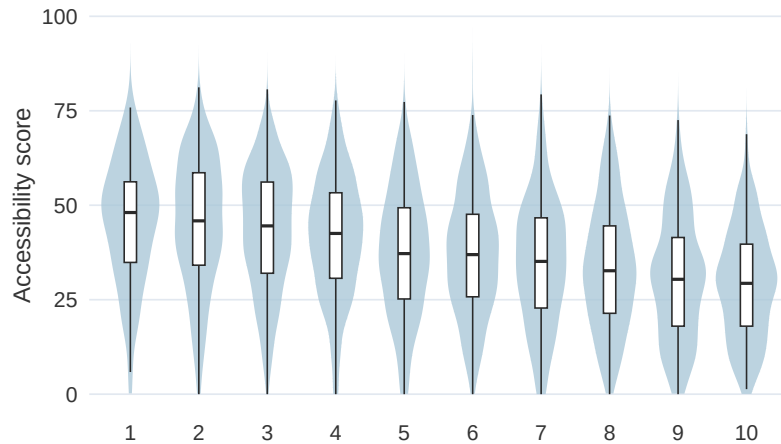

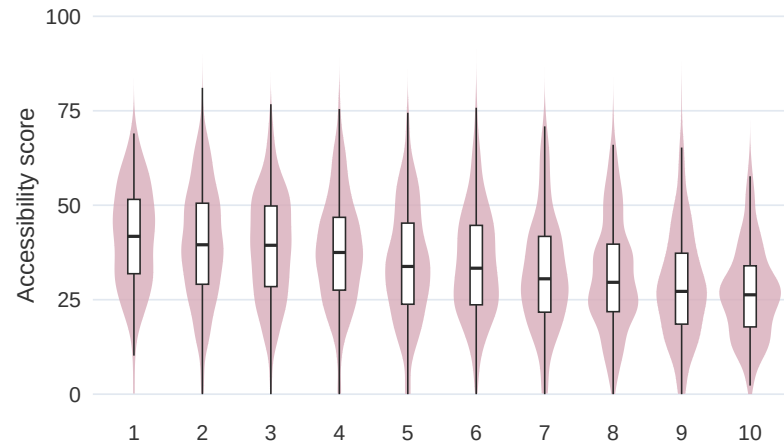

Figure 5A–D. Accessibility, Deprivation and Effect Size

A–C show accessibility distributions by IMD decile; D shows why IMD explains only part of the pattern

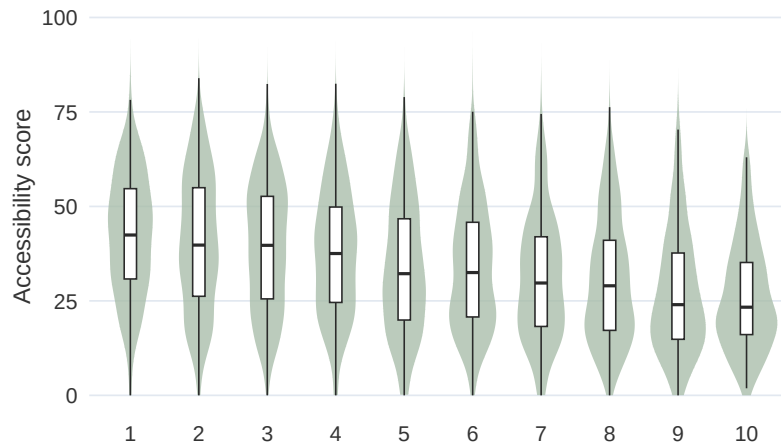

A. Children by IMD

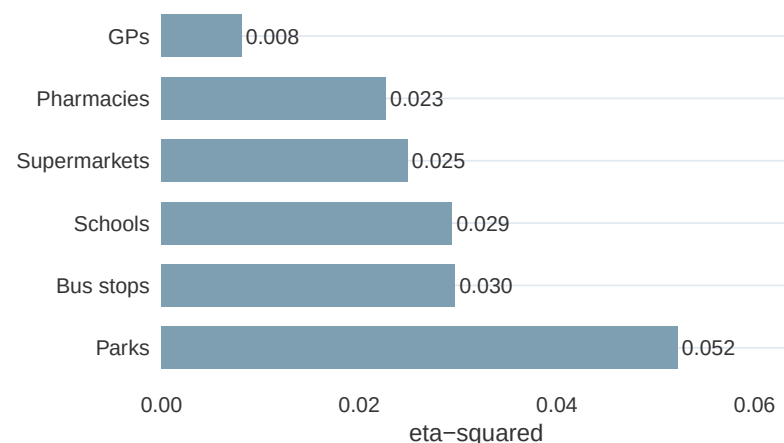

B. Caregiving by IMD

C. Older adults by IMD

D. Effect Size Ranking

IMD decile 1 is most deprived and 10 is least deprived. Effect sizes are small, supporting the deprivation–vulnerability distinction.
